

CATALOGUE SOUL SURFBOARDS 2015

A photograph of a surfboard workshop. In the foreground, a longboard with a black and blue design is mounted on a stand. The stand is made of wooden planks and metal rods. In the background, there are more surfboards on stands, some with yellow and red designs. A person is visible in the background, working on a surfboard. The walls are covered with various papers and photos. The floor is made of concrete and has some paint splatters.

WASABI

One of the most common requests we get from our customers is a board able to handle any situation, that is, an all-round board.

Taking into account the difficulties this word implies, we have selected the best options among several models in order to blend them and get this board as a result. It's really well suited for most of the waves we usually find and it perfectly fulfills its objective. Well distributed outline and volumes, medium rocker and round tail with a double winger for a good manoeuvrability.

ROUND FISH

Here is the quintessential summer board. Soft rocker allowing an easier sliding, and forward volume and full rails for better paddling and planing. Narrow tail and a pronounced Vee to allow unusual turns in this kind of boards.

BUDDY

The design of this model has been inspired by the classic Mini Simmons . After testing and proving the potential of these models in terms of speed and ease of paddling, we decided to give them a more modern and versatile touch.

The features of this model are a flat rocker, generous volume in the nose and a wide tail. The bottom of the board comes with a central concave and triple concave through the fins. The quad fin system provides the necessary grip. Its ease of use leaves no one who tries it indifferent.

DIABLO I

As defined by its name itself, it's a devilishly fast and manoeuvrable board. The design features a flat rocker, forward volume and width, and round rails which make it very fast and comfortable for paddling.

You'll be able to perform plenty of tricks in small waves. Ride it in small measures , 4 or 5 inches less than your usual shortboard.

SHAPER MATT BARROW | DIABLO I - MEASURES 5'4" TO 6'2"

VIPER

This is a board with a soft rocker in the nose and a good kick in the tail. Generous outline both in the nose and tail and round rails for an excellent speed .

We recommend to ride it 4 inches shorter than your regular short-board. Without sacrificing carving ability. For small to medium waves, it is essential in your quiver if you like fast and radical manoeuvres.

LITTLE BUDDY

The perfect board for smaller and less powerful waves. Whether you come from the longboards or shortboards, this model will make you feel like riding a magic carpet. Flat rocker in the nose and a good rocker in the tail for tight turns and to avoid losing speed in the manoeuvres.

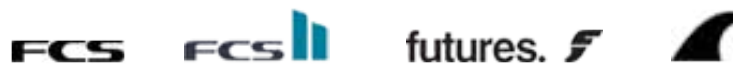

Much of its secret lies in the combination of the bottom and rails. It can be ridden in either a triffin set up by the most radical surfers, or in a quad set up for extra grip and safety.

SHAPER MATT BARROW | LITTLE BUDDY - MEASURES 5'4" TO 6'0"

FINS SYSTEMS - AVAILABLE/DISPONIBLE

BULLDOG

The model we're introducing here will eventually become your all-round board. Designed for the average surfer who wants a good paddling to compete at the peak but also a board with a great performance.

The Bulldog was tested in Maldives under all kinds of conditions and what surprised us the most was its versatility in both long and flat waves and also in more hollow and demanding waves.

Medium rocker in the front and a small kicktail at the back, flat deck with good full rails. There's no need to ask for much central volume, since it is already distributed over the length and width of the board.

BLOB

This model is inspired by an inverted drop. This design features most of the area and volume in the front to help with the paddling and to generate speed effortlessly. The back part provides a good grip due to its narrowness and volume. This is perfect for hollow waves, and combined with its roundpin shape, it allows very tight turns.

This design also comes in a flat rocker that allows an enviable planing and acceleration. Perfect for long beach waves. For surfers with medium to high skill levels.

FINS SYSTEMS - AVAILABLE/DISPONIBLE

CLAYTON LCD

The LCD is the fastest board in our range, you can ride it 4 to 6 inches shorter and 3/4 to 1 inch wider.

The deck is flatter to make it more buoyant & the bottom has a single to double concave. This model come standard with a round tail and winger to help loosen up the board through turns. The board comes as a 5 fin setup so it can be used as a quad or thruster.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'2" TO 5'11"

FINS SYSTEMS - AVAILABLE/DISPONIBLE

CLAYTON MAKOY

Designed with low overall rocker and a central concave for lift. It features a wider tail for acceleration in small waves.

The Makoi Fish paddles great and surfs fast and allows for a wide range of performance in varied surf. Can be used in either a thruster or quad fin set up.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'8" TO 6'4"

Length	Width	Thickness	Weight (kg)	Volume (L)

FINS SYSTEMS - AVAILABLE/DISPONIBLE

CLAYTON MONGREL

The Mongrel incorporates a fish outline on a high performance short board bottom.

The board has slightly more width & volume & slightly less rocker. With the slight Vee through the tail it allows for a quick release and smooth transition from rail to rail. The board is designed so when the wave isn't giving a push & performance, you can create it for yourself.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'4" TO 6'1"

Length	Width	Thickness	Weight (kg)	Volume (L)
5'4	18 3/4	2	40 - 50	21,5

FINS SYSTEMS - AVAILABLE/DISPONIBLE

CLAYTON THE EGG

The Egg is a board that is suited for knee to head high waves that are less powerful and mushy.

The flat rocker, wide template and full rails makes for a easy ride. The shorter length makes for tighter turning with good manoeuvrability. Keep this in the car at all times for those times it is to small and mushy to ride your standard thruster.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'2" TO 6'0"

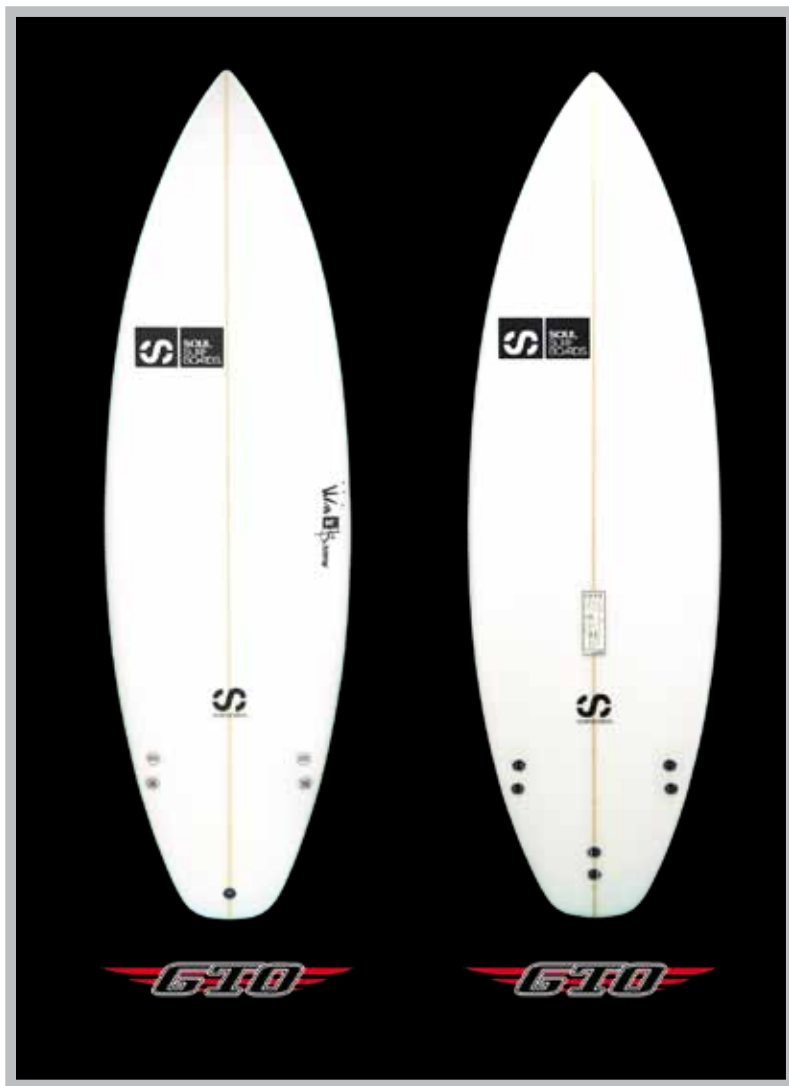

Length	Width	Thickness	Weight (kg)	Volume (L)
5'2	19 3/4	2	40 - 50	22,6

6'0	20 7/8	2 3/4	90 - 100	37,2

FINS SYSTEMS - AVAILABLE/DISPONIBLE

GTO

It is one of the models whose design we have spent more time developing, as we wanted to unite comfort, versatility and performance.

Featuring an slightly wider outline than a conventional shortboard and a forward wide point (maximum width). Moderate rocker that starts from the centre and helps in the paddling and planing generating a good speed, combined with a kick tail (tail rocker) providing manoeuvrability and verticality in turns.

The volume is well distributed throughout the table but without excess to allow getting into the wave sooner. The board features a medium rail which gives the necessary grip to achieve a good performance.

For surfers with medium to high skill levels and all kind of conditions.

Refuerzos de Carbono de serie

FLYER

This board has been developed for good level surfers, and it's especially designed for difficult manoeuvres such as aerials.

The center of balance of this board has been slightly shifted backwards, allowing us to bring more surface on the water and generating more speed. A slightly flatter rocker than usual, simple concave and full rails.

MAGIC

This model has been designed as the most versatile of the boards. It perfectly fits the qualities of any level of surfing.

A little wider than the pro boards without sacrificing manoeuvrability. It comes with a moderate rocker, flat deck and full rails to avoid carrying too much volume. Concave to double concave bottom through the fins.

SHAPER MATT BARROW | MEASURES 5'8" TO 6'6"

CLAYTON GYPSY

The Clayton Gypsy is suited for knee to head high waves, the combined speed and manoeuvrability is almost illegal. The overall generous plan-shape provides a skatey feel and a wide tail allows for more back foot sensitivity. The light single concave and vee out the back increases rail to rail transition.

This model is faster down the line and with the increased rail to rail transition it has a high degree of manoeuvrability and is also more stable when landing airs. The Gypsy is ridden 4 to 6 inches shorter than you regular board and either as a quad or thruster.

CLAYTON TRICKSTER

The Trickster is a modern short board. It is ridden 2 to 4 inches shorter for a tighter turning circle.

The wider bump squash helps plane through the flat section and adds to the boards acceleration. The widest point has been shifted forward, to enable more hold off the rails through manoeuvres. Designed for the intermediate to expert surfer in waist high to overhead waves.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'4" TO 6'1"

Length	Width	Thickness	Weight (kg)	Volume (L)

CLAYTON SWIWEL

The swivel is a forgiving board, with a full plan shape for stability and easy paddling.

It has a single into double concave and its modern rails allow this model to perform like a modern surfboard. This model has a slightly less rocker which allows it to plane over flat sections. You should ride the Swivel 2 to 6 inches longer than the surfers height. The Swivel should be ridden from knee height to over head waves.

SHAPER CLAYTON SURFBOARDS | MEASURES 5' 11" TO 6' 8"

CLAYTON SUPERNOVA

This is our standard short board model that has no weird frills or tweaks.

Just keeping it simple, it is a result of on going re-refinement based on team feedback. It features design elements that allow for a perfect combination of speed and turning.

This model is ridden in the normal dimensions of a regular board.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'7" TO 6'4"

Length	Width	Thickness	Weight (kg)	Volume (L)
5'7	18	2	40 - 50	21,1

CLAYTON SPITFIRE

A longer and narrower board for stylish surfers producing flowing moves.

This board would be well suited for the surfer who enjoys speed coupled with long slow curves. The Spit Fire is a good board for waves with a long open face.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'9" TO 6'6"

Length	Width	Thickness	Weight (kg)	Volume (L)
5'9	18	2	40 - 50	22,1

CLAYTON RED RANGA

This model was designed for the surfer who wants performance while maintaining speed through turns.

The Red Ranga is a small wave board designed for 2 to 5 feet waves. It is a fast and loose option for surfers with a medium to expert skill levels. With its flatter rocker, curvier outline and dynamic new tail shape, it generates plenty of speed. Will handle whatever you can throw at it.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'5" TO 6'2"

Carbon reinforcements series

CLAYTON NED KELLY

The Fuller plan shape hides foam under chest area with a flatter deck. A key feature is the longer double concave through the tail.

The Board is packed full of speed and releases easily off the top due to the vee off the tail. Ridden 1 to 2 inches shorter than regular board.

SHAPER CLAYTON SURFBOARDS | MEASURES 5'6" TO 6'3"

Length	Width	Thickness	Weight (kg)	Volume (L)
5'6	18 1/8	2	40 - 50	21,3

CLAYTON INDO

The Indo model is a step up board for the larger, heavier waves. It can be ridden 2 to 8 inches longer and has softer rails for hold in hollow waves.

We have added extra volume under the chest for more paddle power. The bottom has a soft single concave with extended rocker to fit better in the waves.

SHAPER CLAYTON SURFBOARDS | MEASURES 6'0" TO 7'0"

CHOOSE YOUR SURFBOARD STYLE!

EVO 2 FAT-BOY CLAYTON THE PERFORMER CLAYTON NOSERIDER CLAYTON EVO DACKEL BUZZY BALANCE PERFORMANCE MS II
SINGLE-FISH BLUNT NOSE MINISIMONS

EV02

We offer one of the most comfortable boards for surfing. Due to its design it can be considered both as a learning board and a model for those experts who want a manoeuvrable yet stable board.

Its wide nose provides stability, and its generous and very distributed volume gives us a good paddling. It also features a rounpin tail and little volume, which offers an excellent performance in turns, providing a very quick rail to rail transition.

FAT BOY

For the large board lovers we offer the longboard sensation with the mobility of a shortboard. This model will not disappoint anyone who tries it, since it puts an end to the belief that a big board is slow and not manoeuvrable.

This model was shaped by Matt for Beau Young on one of his visits to the factory in England. Ideal for almost any condition, including big sized waves, since it features a configuration of box and stabilizers, providing extra grip in difficult conditions. The recommended measure is 6'4".

SHAPER MATT BARROW | MEASURES 6'2" TO 6'8"

Watt Barrow

6'2	6'3	6'4	6'5	6'6	6'8

FINS SYSTEMS - AVAILABLE/DISPONIBLE

CLAYTON EVO

The Evo is a mid range board that paddles well and catches waves in crowded surf for all sizes without sacrificing manoeuvrability and the curvy outlines keeps it free on the face.

The model has a bottom curve that enables the board to effortlessly catch waves and still carves rail turns. Great intermediate or older surfers all rounder.

SHAPER CLAYTON SURFBOARDS | MEASURES 7'0" TO 7'8"

FINS SYSTEMS - AVAILABLE/DISPONIBLE

CLAYTON THE PERFORMER

This model can be ridden as a single fin or box and trailer set up. The smooth blend of the 2 makes them stable up front and super loose of off the back end.

The model combines a smooth tail curve and concaves for an awesome mode.

SHAPER CLAYTON SURFBOARDS | MEASURES 9'0

Length	Width	Thickness	Weight (kg)	Volume (L)

9'0	21 1/2	2 3/4	80 - 90	62,4

FINS SYSTEMS - AVAILABLE/DISPONIBLE

CLAYTON NOSERIDER

The Nose Rider is the old school, classic long board. It has a very low water entry with a spoon concave in the nose for added nose time.

The tail has a gentle Vee through it with soft rounded rails. This model can be ridden as a single fin or box and trailer set up. The Mongrel incorporates a fish outline on a high performance short board bottom.

The board has slightly more width and volume and slightly less rocker. With the slight Vee through the tail it allows for a quick release and smooth transition from rail to rail. The board is designed so when the wave isn't giving a push and performance, you can create it for yourself.

SHAPER CLAYTON SURFBOARDS | MEASURES 9'0"

Length	Width	Thickness	Weight (kg)	Volume (L)
9'0	20 1/2	2 1/2	50 - 60	54
9'0	20 3/4	2 1/2	55 - 65	54,7
9'0	21	2 1/2	60 - 70	55,3
9'0	21 1/4	2 5/8	65 - 75	58,7
9'0	21 1/2	2 5/8	70 - 80	59,4
9'0	21 3/4	2 3/4	75 - 85	62,8
9'0	22	2 7/8	80 - 90	66,3

CLAYTON MINI MAL

The Clayton Mini Mal is a board for a range of surfers. Whether you are starting out or returning from years of not surfing, this board will be forgiving, stable and fun. It is a family favourite for all ages being easier to handle than a longboard.

Almost every surfer has started out by surfing a Mini Mal. This board can be ridden by beginners through to advanced surfers alike. From the smallest of surf for the beginners to overhead waves for the advanced Minimal surfer. Designs can be customised for your particular preference and stage of surfing.

SHAPER CLAYTON SURFBOARDS | MEASURES 7'0" TO 7'8"

Length	Width	Thickness	Weight (kg)	Volume (L)
7'0	20	2 1/4	60 - 70	37
7'2	20 1/2	2 3/8	70 - 80	41
7'4	20 1/2	2 1/2	80 - 90	44,1
7'4	21	2 5/8	85 - 95	47,5
7'6	21	2 3/4	90 - 100	50,9
7'6	21 1/2	2 7/8	95 - 105	54,4
7'8	22	3	100 - 110	59,4

PERFORMANCE

It is probably the most versatile longboard.

It allows you to both perform heart-stopping falls in waves up to two metres and to ride the crest of 1'5 metres waves. A safe bet ...

SHAPER MATT BARROW | MEASURES 9'0" TO 9'4"

Matt Barrow

9'0	9'2	9'4
22 1/2	22 5/8	22 3/4
2 3/4	2 3/4	2 7/8

BLUNT NOSE

Measures from 9'0 to 9'6. Progressive longboard oriented to a retro surf with more manoeuvrability in turns.

Flat rocker up until the last third, where the tail rocker ends in a scop tail with a quite pronounced Vee, providing more turn capacity and control. The board features 50/50 rails. "Boxy rail" at the connection point with the "winger" in its more performance version. Marked blunt nose right at the beginning of the nose concave. Such concave is "open" in its final part towards the back of the bottom to avoid slowing the table under mild choppy conditions but laterally marked to increase its effect on the noseride.

Very fast longboard and surprisingly manoeuvrable in spite of its size, weight and retro design.

SHAPER DIEGO GONZÁLEZ | MEASURES 9'0" TO 9'6"
